

Kadir Kadiroğlu

I have been passionate about electronics since childhood and have completed numerous DIY projects in electronics, programming, and control.

My natural curiosity pushed me to explore these fields deeply, giving me a strong engineering foundation—especially in mechatronics.

I enjoy discovering and developing ideas that advance mechatronic technology.

In my free time I build and experiment with diverse mechatronics projects to see real-world results.

Hands-on project work drives continuous learning and steady skill improvement.

I combine mechanical, electrical, and software knowledge to solve complex engineering challenges.

I am eager to apply my skills professionally in innovative projects that sharpen my problem-solving and deliver real impact.

Personal

Name
Kadir Kadiroğlu

Address
Türkiye
30300 İstanbul

Email

Education and Qualifications

Mechatronics Engineering <i>İstanbul Bilgi University, İstanbul</i>	Aug 2018 - Aug 2020
Mechatronics Engineering <i>Yıldız Technical University, İstanbul</i>	Aug 2020 - Jul 2024

Skills

Interests

Electronics DIY projects, programming and system integration

Rapid prototyping, 3D printing & test-driven productization

Software Development

Research and Learning

Technology trends, innovation & productization

Language Learning

Content creation — short-form video (Instagram Reels) for project demonstrations

Independent research & continuous learning across diverse technical topics

Electronic Circuit and PCB Design

Science Documentaries and Podcasts

Conduct Personal Research

Sensors, actuators & hardware integration

3D Design and Printing

Scientific Reading

Listening to Music from Different Cultures

Exploring New Places

Technical writing & article development (ideas, drafts, publication)

Fusion 360: generative design,simulation,animation	<div></div>
SolidWorks	<div></div>
